Front-end Developer

I'm a recent science college graduate with 22 years old, I found my passion for coding especially front-end for 2 years, throughout these 2 years, I learned:

- **VCS [ex; git]:** git-flow branching model, rebase, writing accepted commits with notes, and contributing.
- **Framework [React]:** Hooks, state management, portals, profiler, and how to write a clean component.
- **Fundamental cores:** JS, CSS, HTML
- **Styling helpers:** Twitter bootstrap, sass predecessor.
- **Others:** working with CMD, SVG, Firebase.

I aim to catch a training to be an awareness about team collaborations, and the project life cycle from being just an idea till release in the stage as a production.
